
THE VIRGINIA REGISTER INFORMATION PAGE

THE VIRGINIA REGISTER is an official state publication issued every other week throughout the year. Indexes are published quarterly, and the last index of the year is cumulative. **THE VIRGINIA REGISTER** has several functions. The new and amended sections of regulations, both as proposed and as finally adopted, are required by law to be published in **THE VIRGINIA REGISTER OF REGULATIONS**. In addition, **THE VIRGINIA REGISTER** is a source of other information about state government, including all emergency regulations and executive orders issued by the Governor, the Virginia Tax Bulletin issued periodically by the Department of Taxation, and notices of public hearings and open meetings of state agencies.

ADOPTION, AMENDMENT, AND REPEAL OF REGULATIONS

An agency wishing to adopt, amend, or repeal regulations must first publish in the *Virginia Register* a notice of intended regulatory action; a basis, purpose, substance and issues statement; an economic impact analysis prepared by the Department of Planning and Budget; the agency's response to the economic impact analysis; a summary; a notice giving the public an opportunity to comment on the proposal; and the text of the proposed regulation.

Following publication of the proposal in the *Virginia Register*, the promulgating agency receives public comments for a minimum of 60 days. The Governor reviews the proposed regulation to determine if it is necessary to protect the public health, safety and welfare, and if it is clearly written and easily understandable. If the Governor chooses to comment on the proposed regulation, his comments must be transmitted to the agency and the Registrar no later than 15 days following the completion of the 60-day public comment period. The Governor's comments, if any, will be published in the *Virginia Register*. Not less than 15 days following the completion of the 60-day public comment period, the agency may adopt the proposed regulation.

The appropriate standing committee of each branch of the General Assembly may meet during the promulgation or final adoption process and file an objection with the Registrar and the promulgating agency. The objection will be published in the *Virginia Register*. Within 21 days after receipt by the agency of a legislative objection, the agency shall file a response with the Registrar, the objecting legislative committee, and the Governor.

When final action is taken, the agency again publishes the text of the regulation as adopted, highlighting all changes made to the proposed regulation and explaining any substantial changes made since publication of the proposal. A 30-day final adoption period begins upon final publication in the *Virginia Register*.

The Governor may review the final regulation during this time and, if he objects, forward his objection to the Registrar and the agency. In addition to or in lieu of filing a formal objection, the Governor may suspend the effective date of a portion or all of a regulation until the end of the next regular General Assembly session by issuing a directive signed by a majority of the members of the appropriate standing committees and the Governor. The Governor's objection or suspension of the regulation, or both, will be published in the *Virginia Register*. If the Governor finds that changes made to the proposed regulation have substantial impact, he may require the agency to provide an additional 30-day public comment period on the changes. Notice of the additional public comment period required by the Governor will be published in the *Virginia Register*.

The agency shall suspend the regulatory process for 30 days when it receives requests from 25 or more individuals to solicit additional public comment, unless the agency determines that the changes have minor or inconsequential impact.

A regulation becomes effective at the conclusion of the 30-day final adoption period, or at any other later date specified by the promulgating agency, unless (i) a legislative objection has been filed, in which event the regulation, unless withdrawn, becomes effective on the date specified, which shall be after the expiration of the 21-day extension

period; (ii) the Governor exercises his authority to require the agency to provide for additional public comment, in which event the regulation, unless withdrawn, becomes effective on the date specified, which shall be after the expiration of the period for which the Governor has provided for additional public comment; (iii) the Governor and the General Assembly exercise their authority to suspend the effective date of a regulation until the end of the next regular legislative session; or (iv) the agency suspends the regulatory process, in which event the regulation, unless withdrawn, becomes effective on the date specified, which shall be after the expiration of the 30-day public comment period.

Proposed regulatory action may be withdrawn by the promulgating agency at any time before the regulation becomes final.

EMERGENCY REGULATIONS

If an agency demonstrates that (i) there is an immediate threat to the public's health or safety; or (ii) Virginia statutory law, the appropriation act, federal law, or federal regulation requires a regulation to take effect no later than (a) 280 days from the enactment in the case of Virginia or federal law or the appropriation act, or (b) 280 days from the effective date of a federal regulation, it then requests the Governor's approval to adopt an emergency regulation. The emergency regulation becomes operative upon its adoption and filing with the Registrar of Regulations, unless a later date is specified. Emergency regulations are limited to addressing specifically defined situations and may not exceed 12 months in duration. Emergency regulations are published as soon as possible in the *Register*.

During the time the emergency status is in effect, the agency may proceed with the adoption of permanent regulations through the usual procedures. To begin promulgating the replacement regulation, the agency must (i) file the Notice of Intended Regulatory Action with the Registrar within 60 days of the effective date of the emergency regulation; and (ii) file the proposed regulation with the Registrar within 180 days of the effective date of the emergency regulation. If the agency chooses not to adopt the regulations, the emergency status ends when the prescribed time limit expires.

STATEMENT

The foregoing constitutes a generalized statement of the procedures to be followed. For specific statutory language, it is suggested that Article 2 (§ 9-6.14:7.1 et seq.) of Chapter 1.1:1 of the Code of Virginia be examined carefully.

CUMULATIVE TABLE OF VIRGINIA ADMINISTRATIVE CODE SECTIONS ADOPTED, AMENDED, OR REPEALED

The table printed below lists regulation sections, by Virginia Administrative Code (VAC) title, that have been amended, added or repealed in the *Virginia Register* since the regulations were originally published or last supplemented in VAC (the Spring 1998 VAC Supplement includes final regulations published through *Virginia Register* Volume 14, Issue 10, dated February 2, 1998). Emergency regulations, if any, are listed, followed by the designation "emer," and errata pertaining to final regulations are listed. Proposed regulations are not listed here. The table lists the sections in numerical order and shows action taken, the volume, issue and page number where the section appeared, and the effective date of the section.

TITLE 1. ADMINISTRATION

DEPARTMENT OF GENERAL SERVICES

† Withdrawal of Notice of Intended regulatory Action

Notice is hereby given that the Department of General Services has **WITHDRAWN** the Notice of Intended Regulatory Action for 1 VAC 30-50-10 et seq., Regulations for Breath Alcohol Testing. Sections 2.1-434.1 through 2.1-434.12 of the Code of Virginia establishing the Division of Forensic Science were repealed by the 1996 Acts of the General Assembly. Section 9-196.1 of the Code of Virginia establishes the Division of Forensic Science within the Department of Criminal Justice Services.

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the Department of General Services intends to consider promulgating regulations entitled: **1 VAC 30-45-10 et seq. Environmental Laboratory Certification Program.** The purpose of the proposed action is to establish procedures, standards and requirements for the certification of laboratories performing tests and analyses required by the Virginia Waste Management Act and the State Water Control Law. The program established by the regulation will ensure that these laboratories provide accurate and consistent tests, analyses, measurements and monitoring.

Public Meeting: A public meeting will be held by the Division of Consolidated Laboratory Services in House Room 1, State Capitol Building, Capitol Square, Richmond, Virginia 23219, at 10:30 a.m. on Wednesday, September 30, 1998, to discuss the intended action. Unlike a public hearing, which is intended only to receive testimony, this meeting is being held to discuss and exchange ideas and information relative to regulation development.

Ad Hoc Advisory Group: The department will form an ad hoc advisory group to assist in the development of the regulation. If you desire to be in the group, notify the agency contact in writing by 4:30 p.m. on October 1, 1998, and provide your name, address, phone number and the organization you represent (if any). Notification of the composition of the ad hoc advisory group will be sent to all applicants. If you wish to be in the group, you are encouraged to attend the public meeting mentioned above. The primary function of the group is to develop recommended regulation amendments for department consideration through the collaborative approach of regulatory negotiation and consensus.

Public Hearing Plans: After publication in the Virginia Register of Regulations, the department will hold at least one public hearing to provide opportunity for public comment on any regulation amendments drafted pursuant to this notice.

Need: The contemplated regulation is essential (i) to protect the health, safety or welfare of citizens and (ii) for the efficient and economical performance of an important governmental function. The reasoning for this conclusion is set forth below.

Compliance with the State Water Control Law and the Virginia Waste Management Act is determined, to a great extent, by the analysis of samples and other measurements taken of Virginia's water and terrain. Accurate and consistent analysis of these samples ensures that the determination of compliance with Virginia's water quality and waste management laws is also accurate and consistent. In turn, the health and welfare of the people of the Commonwealth are protected. In addition, samples from those parties whose compliance is being determined are analyzed in an equally consistent and accurate fashion.

Certifying laboratories that do consistent and accurate analyses ensures efficient and economical implementation of the state's water and waste laws. The state agency responsible for carrying out the laws will be assured that they can rely upon the analytical results of certified laboratories in determining compliance with these laws.

In addition, the state law requires the use of nationally accepted accreditation standards. Virginia's water quality and waste management laws and regulations are mandated in part by federal statute and regulation. Because the federal government funds the implementation of these laws in the state to some extent, it also determines whether the state agency carrying out these federal mandates is doing an acceptable job. An accurate, consistent and verifiable analysis in certified laboratories of samples taken to determine compliance provides assurance of the state's competency in implementing federal mandates on water quality and waste management.

Alternatives: Alternatives to the proposed regulation amendments being considered by the department are:

1. Develop the regulation to satisfy the provisions of the law and federal standards and policies. This option is being selected because it meets the stated purpose of the regulatory action: to ensure that laboratories perform accurate and consistent tests, analyses, measurements and monitoring required by the Virginia Waste Management Act and the State Water Control Law.
2. Make alternative regulatory changes to those required by the provisions of the law and federal standards and policies. This option is not being selected

Notices of Intended Regulatory Action

because it does not meet the stated purpose of the regulation and may not be consistent with state law and federal standards and policies.

3. Take no action to develop the regulation. This option is not being selected because state law requires that a regulation be developed.

Applicable Statutory Requirements: The contemplated regulation is mandated by state law. A succinct statement of the source (including legal citation) and scope of the mandate may be found below.

Section 2.1-429.01 of the Code of Virginia (Title 2.1, Chapter 32) requires that the Division of Consolidated Laboratory Services establish a program by regulation that will certify laboratories conducting tests, analyses, measurements, or monitoring pursuant to the Virginia Waste Management Act (§ 10.1-1400 et seq.) or the State Water Control Law (§ 62.1-44.2 et seq.). The program is to be based on standards adopted by the National Environmental Laboratory Accreditation Conference sponsored by the U.S. Environmental Protection Agency to ensure accurate and consistent testing and analysis by the certified laboratories.

The state law requires that the program include minimum criteria for the following: (i) laboratory procedures; (ii) performance evaluations; (iii) supervisory and personnel requirements; (iv) facilities and equipment; (v) analytical quality control and quality assurance; (vi) certificate issuance and maintenance; (vii) recertification and decertification; and (viii) granting full and partial exemptions from the program based on compliance and performance. The law also requires that a fee system be established to pay for the costs of certifying laboratories under this program. Procedures for determining the qualifications of laboratories outside of Virginia used to conduct tests and analyses for use in Virginia must also be developed under § 2.1-429.01 of the Code of Virginia. In addition, the law allows other components to be added to the program.

Statutory Authority: § 2.1-429.01 of the Code of Virginia.

TITLE 8. EDUCATION

STATE BOARD OF EDUCATION

† Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the State Board of Education intends to consider amending regulations entitled: **8 VAC 20-131-10 et seq. Regulations Establishing Standards for Accrediting Public Schools in Virginia.** The purpose of the proposed action is to incorporate new language as required by § 22.1-253.13:4 F of the Code of Virginia (enacted by the 1998 Session of the General Assembly) which requires the State Board of Education to develop criteria for recognizing exemplary performance in vocational studies by students who have completed the requirements for a standard or advanced studies diploma and to award seals on the diploma of students meeting such criteria. The agency intends to hold a public hearing on the proposed action after publication.

Statutory Authority: §§ 22.1-16, 22.1-19 and 22.1-253.13:3 of the Code of Virginia.

Public comments may be submitted until October 28, 1998.

TITLE 9. ENVIRONMENT

STATE AIR POLLUTION CONTROL BOARD

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the State Air Pollution Control Board intends to consider amending regulations entitled: **9 VAC 5-91-10 et seq. Regulation for the Control of Motor Vehicle Emissions in Northern Virginia.** The purpose of the proposed action is to develop a regulation revision which conforms to state law and federal Clean Air Act requirements for the testing of emissions from motor vehicles located or primarily operated in Northern Virginia.

Public Meeting: A public meeting will be held by the department in the regional headquarters in Woodbridge, 13901 Crown Court, Woodbridge, Virginia, at 10 a.m. on Tuesday, September 29, 1998, to discuss the intended action. Unlike a public hearing, which is intended only to receive testimony, this meeting is being held to discuss and

Notices of Intended Regulatory Action

exchange ideas and information relative to regulation development.

Accessibility to Persons with Disabilities: The meeting is being held at a public facility accessible to persons with disabilities. Any person with questions on the accessibility of the facility should contact Ms. Faye Arrington at the Office of Air Quality Programs, Department of Environmental Quality, P.O. Box 10009, Richmond, Virginia 23240, or by telephone at (804) 698-4031 or TTY (804) 698-4021. Persons needing interpreter services for the deaf must notify Ms. Arrington no later than September 15, 1998.

Ad Hoc Advisory Group: The department is soliciting comments on the advisability of forming an ad hoc advisory group, utilizing a standing advisory committee or consulting with groups or individuals registering interest in working with the department to assist in the drafting and formation of any proposal. The primary function of any group, committee or individuals that may be utilized is to develop recommended regulation amendments for department consideration through the collaborative approach of regulatory negotiation and consensus. Any comments relative to this issue may be submitted until 4:30 p.m. September 30, 1998, to David J. Kinsey, Office of Air Quality Programs, Department of Environmental Quality, P.O. Box 10009, Richmond, Virginia 23240.

Public Hearing Plans After publication in the Virginia Register of Regulations, the department will hold at least one public hearing to provide opportunity for public comment on any regulation drafted pursuant to this notice.

Need: One of the primary goals of the federal Clean Air Act (Act) is the attainment and maintenance of the National Ambient Air Quality Standards (NAAQS). These standards, designed to protect public health and welfare, apply to six pollutants, of which ozone is the primary focus of this proposed action. Ozone is formed when volatile organic compounds (VOCs) and nitrogen oxides (NO_x) in the air react together in the presence of sunlight. VOCs are chemicals contained in gasoline, polishes, paints, varnishes, cleaning fluids, inks, and other household and industrial products. NO_x emissions are a byproduct from the combustion of fuels and industrial processes.

The National Ambient Air Quality Standard for ozone is currently 0.12 parts per million (ppm) and was established by the U.S. Environmental Protection Agency (EPA) to protect the health of the general public with an adequate margin of safety. When concentrations of ozone in the ambient air exceed the federal standard the area is considered to be out of compliance and is classified as "nonattainment." Several counties and cities within the Northern Virginia area have been identified as ozone nonattainment areas according to provisions of the Act.

States are required to develop plans to ensure that areas will come into compliance with the federal health standard. Failure to develop adequate programs to meet the ozone air quality standard (i) may result in the continued violations of the standard and subsequent negative affects on human health, (ii) may result in assumption of the program by EPA

at which time the Commonwealth would lose authority over matters affecting its citizens, and (iii) may result in the implementation of sanctions by EPA, such as more restrictive requirements on new major industrial facilities and loss of federal funds for highway construction. Furthermore, if a particular area fails to attain the federal standard by the legislatively mandated attainment date, EPA is required to reassign it to the next higher classification level (denoting a worse air quality problem), thus subjecting the area to more stringent control requirements.

Motor vehicle emissions inspection programs, known as inspection and maintenance (I/M) programs, are an integral part of the effort to reduce mobile source air pollution. Cars and trucks create about half of the ozone air pollution. Of all highway vehicles, passenger cars and light trucks emit most of the vehicle-related carbon monoxide and ozone-forming hydrocarbons. Tremendous progress has been made in reducing these pollutants; however, total vehicle emissions remain high. This is because the number of vehicle miles traveled on our highways has doubled in the last 20 years, offsetting much of the technological progress in vehicle emission control over the same two decades. Ongoing efforts to reduce emissions from individual vehicles will be necessary to achieve the agency's air quality goals.

I/M programs achieve their objective by identifying vehicles that have high emissions as a result of one or more malfunctions and requiring them to be repaired. Minor malfunctions in the emissions control system can increase emissions significantly. The average car on the road can emit three to four times the carbon monoxide and hydrocarbons allowed by new car standards if emission control systems are malfunctioning. Unfortunately, rarely is it obvious which cars have malfunctions as the emissions themselves may not be noticeable and emission control malfunctions do not necessarily affect vehicle driveability.

I/M programs provide a way to check whether the emission control systems on a vehicle are working correctly. All new passenger cars and trucks sold in the United States today must meet stringent air pollution standards and those standards became more stringent in model year 1994, but they can only retain this low-polluting profile if the emission controls and engine are functioning properly. An I/M program is designed to ensure that vehicles stay clean in actual use. This, in turn, can substantially reduce the amount of volatile organic compounds, carbon monoxide, and nitrogen oxides emitted to the ambient air, thereby reducing the formation of ozone, lowering ozone concentrations, and contributing toward attainment of the NAAQS.

Alternatives:

1. Draft new regulation revisions which will provide for implementation of a motor vehicle emissions testing program that meets the provisions of the state code, federal Clean Air Act and associated EPA regulations and policies.
2. Draft new regulation revisions which will provide for implementation of a motor vehicle emissions testing

Notices of Intended Regulatory Action

program that does not meet the provisions, or meets alternative provisions, of the state code, federal Clean Air Act and associated EPA regulations and policies. No regulatory alternatives to an enhanced I/M program have been promulgated by EPA as meeting the requirements of the Act. Adopting an unapprovable program will result in sanctions being imposed by EPA.

3. Take no action to develop the regulation revisions and risk sanctions by EPA.

Costs and Benefits: The department is soliciting comments on the costs and benefits of the alternatives stated above or other alternatives.

Applicable Statutory Requirements: The 1990 amendments to the Clean Air Act established a process for evaluating the air quality in each region and identifying and classifying each nonattainment area according to the severity of its air pollution problem. Nonattainment areas are classified as marginal, moderate, serious, severe and extreme. Marginal areas are subject to the least stringent requirements and each subsequent classification (or class) is subject to successively more stringent control measures. Areas in a higher classification of nonattainment must meet the mandates of the lower classifications plus the more stringent requirements of its own class.

The Northern Virginia area has an ozone air pollution problem classified by the EPA as "serious." The problem is a result of emissions from both industrial sources and motor vehicles. The Act requires that all areas classified as serious must implement an enhanced vehicle emissions inspection and maintenance program, commonly referred to as I/M.

Section 182(c)(3) of the federal Clean Air Act requires that the state submit revisions to the state implementation plan to "provide for an enhanced program to reduce hydrocarbon emissions and NO_x emissions from in-use motor vehicles...." The program "shall comply in all respects with guidance...by the Administrator..." The Act requires that enhanced I/M programs be implemented within two years of enactment (11/16/90) of the Clean Air Act Amendments of 1990. The program implemented by the state must achieve a performance standard equal to:

(i) "...a program combining emission testing, including on-road emission testing, with inspection to detect tampering with emission control devices and misfueling for all light-duty vehicles and all light-duty trucks subject to standards under § 202; and

(ii) program administration features necessary to reasonably assure that adequate management resources, tools, and practices are in place to attain and maintain the performance standard."

The compliance method is to be established, per the Act, by EPA. The state program, per the Act, must include, at a minimum:

1. Computerized emission analyzers, including on-road testing devices.

2. No waivers for vehicles and parts covered by an emission control performance warranty.

3. For nonwarranty situations, waivers only after \$450 (in 1990 dollars) has been spent for emissions-related repairs.

4. Enforcement through registration denial.

5. Annual testing unless biennial testing, in combination with other features, will equal or exceed emissions reductions obtainable through annual inspections.

6. Operation on a centralized basis unless the state demonstrates to the satisfaction of the administrator that a decentralized program will be equally effective.

This law is implemented by EPA through 40 CFR Part 51, subpart S. The performance standard for the program is contained in § 51.351, "Enhanced I/M Performance Standard." It includes:

1. Centralized testing.

2. Annual testing.

3. Testing of 1968 and later model year vehicles.

4. Transient, mass emissions testing on 1986 and later model year vehicles, two-speed idle testing of 1981-1985 vehicles, and single-speed idle testing of pre-1981 vehicles.

5. Testing of light duty vehicles and trucks.

6. Emissions standards according to model year and weight class as enumerated in § 51.351(a)(7).

7. Visual inspection of the catalyst and fuel inlet restrictor on all 1984 and later model year vehicles.

8. Evaporative system integrity (pressure) test on 1983 and later vehicles and an evaporative system transient purge test on 1986 and later vehicles.

9. Twenty percent emission test failure rate among pre-1981 model year vehicles

10. Three percent (3%) waiver rate

11. Ninety-six percent (96%) compliance rate

12. On-road testing of at least 0.5% of the subject vehicle population.

Under the current rule, the state has considerable flexibility to design its own program and demonstrate that it is as effective as the EPA model program in reducing emissions.

Sections 46.2-1176 through 46.2-1187.3 of the Virginia Motor Vehicle Emissions Control Law (Title 46.2, Chapter 10, Article 22 of the Code of Virginia) requires a "test and repair enhanced emissions inspection program" for vehicles that have actual gross weights of 10,000 pounds or less and are registered in the Counties of Arlington, Fairfax, Loudoun, Prince William, and Stafford, and the and the Cities of Alexandria, Fairfax, Falls Church, Manassas, and Manassas Park. Key provisions of the legislation include:

Notices of Intended Regulatory Action

1. A biennial inspection;
2. An inspection fee cap of \$20;
3. A minimum repair cost of \$450 (in 1990 dollars) in order to qualify for a waiver, and requirement that repairs to qualify for a waiver be done by a certified repair technician;
4. Motor vehicles being titled for the first time may be registered for up to two ears without being subject to an emissions inspection;
5. An exemption for any of the following vehicles, (i) vehicles powered by a clean special fuel as defined in § 58.1-2101, (ii) motorcycles, (iii) vehicles which, at the time of manufacture were not designed to meet emission standards set or approved by the federal government, (iv) any antique motor vehicle as defined in § 46.2-100 and licensed pursuant to § 46.2-730, or (v) vehicles for which no testing standards have been adopted by the board;
6. The requirement for the inspection to apply to all vehicles registered and/or operated in the affected area including (i) vehicles owned by government entities, (ii) vehicles owned by military personnel residing in the affected areas, and (iii) vehicles owned by leasing or rental companies;
7. The certification of motor vehicle emissions repair technicians and emissions repair facilities, including the suspension or revocation of such certification;
8. In addition to biennial testing of all subject vehicles, on-road testing of motor vehicles in use and requirement for follow-up testing of those vehicles which exceed emissions standards; and

The Code of Virginia directs the State Air Pollution Control Board to adopt regulations to implement the program.

STATE WATER CONTROL BOARD

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the State Water Control Board intends to consider amending regulations entitled: **9 VAC 25-260-10 et seq. Water Quality Standards.** The purpose of the proposed action is to consider whether the board should amend the Upper James River Basin section tables to

correct the stream classification of a small section of the Jackson River in Alleghany County. The rulemaking, if adopted, will correctly classify the section from a Class V, stockable trout water, to a Class IV, mountainous zone water. The Department of Game and Inland Fisheries (DGIF) has informed the department that the amendment classifying the section as a stockable trout water which became effective in December 1997 is incorrect.

Intent: The intent of the amendment is to protect the aquatic life expected to inhabit the Jackson River.

Need: The amendment is necessary in order to correctly classify the stream to protect the aquatic life which is expected to inhabit the stream and ensure that Westvaco's point source discharges to the stream are not required to install additional treatment capability.

Alternatives Available to Meet the Need: Water quality standards are regulations; therefore, a regulatory action is necessary to meet the need of the intended regulatory action based on DGIF advising the department that the current regulatory classification is incorrect. There may be options as to the specific designation of stockable trout water, if any, within this stretch of the Jackson River. These will be developed in conjunction with the DGIF based on their technical data on the designation and public comment received in response to this notice.

Comments: Comments are requested on the intended regulatory action, including any ideas to assist the department in the development of the proposal. Comments are also requested on the costs and benefits of the stated alternatives or other alternatives.

Participatory Approach and Public Meeting: The State Water Control Board has authorized the department to develop the proposed regulation without using the participatory approach and without holding a public meeting.

Public Hearing: The State Water Control Board will convene a public hearing on the proposed regulation after publication of the proposal. This has not been scheduled yet.

Statutory Authority: § 62.1-44.15 (3a) of the Code of Virginia.

Public comments may be submitted until October 14, 1998, to Dr. Alan J. Anthony, Department of Environmental Quality, P.O. Box 10009, Richmond, VA 23240.

TITLE 12. HEALTH

STATE BOARD OF HEALTH

† Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the State Board of Health intends to consider promulgating regulations entitled: **12 VAC 5-408-10 et seq. Regulations for the Certification of Quality Assurance of Managed Care Health Insurance Plan Licensees.** The purpose of the proposed action is to implement Senate Bill 712 (1998) which establishes a quality assurance certification program for managed care health insurance plan (MCHIP) licensees. All MCHIP licensees will have to obtain certification and remain certified by the State Health Commissioner to confirm the quality of health care services they deliver. The regulation will define the expectations relating to quality upon which certification will be based. The agency intends to hold a public hearing on the proposed regulation after publication.

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the State Board of Health intends to consider amending regulations entitled: **12 VAC 5-520-10 et seq. Regulations Governing the State Dental Scholarship Program.** The purpose of the proposed action is to review the regulations and amend them so as to ensure the sound and orderly administration of the related program that awards conditional educational grants to dental students based on their agreement to practice dentistry in an area of the Commonwealth that is recognized by the board as being underserved by dentists. Resulting amendments may include provisions that (i) refine the criteria employed in awarding scholarships; (ii) require that the commencement of recipients' dental practice will occur within two years following the completion of their dental residency; and (iii) include an alternative method of reimbursing the Commonwealth for students who either fail to complete dental school or fail to satisfy their obligation to practice in an underserved area. Resulting amendments may also address other issues relating to these regulations that the public, regulants, and health planning community deem appropriate to raise. Resulting amendments may (i) provide for the electronic reporting of births, (ii) allow delayed reporting of births when warranted, (iii) specify information needed to evidence home births, and (iv) establish protections against the unauthorized, unwarranted, and indiscriminate disclosure of vital records. Resulting amendments may also address other issues relating to these regulations that the public, regulated persons, and health planning community deem appropriate to raise in response to this notice. PUBLIC COMMENT PERIODS - PROPOSED REGULATIONS

PUBLIC COMMENT PERIODS REGARDING STATE AGENCY REGULATIONS

This section gives notice of public comment periods and public hearings to be held on proposed regulations. The notice will be published once at the same time the proposed regulation is published in the Proposed Regulations section of the *Virginia Register*. The notice will continue to be carried in the Calendar of Events section of the *Virginia Register* until the public comment period and public hearing date have passed.

Notice is given in compliance with § 9-6.14:7.1 of the Code of Virginia that the following public hearings and public comment periods regarding proposed state agency regulations are set to afford the public an opportunity to express their views.

TITLE 16. LABOR AND EMPLOYMENT

DEPARTMENT OF LABOR AND INDUSTRY

October 20, 1998 - 2 p.m. – Public Hearing
State Capitol, Capitol Square, House Room 2, Richmond, Virginia.

November 30, 1998 - Public comments may be submitted until this date.

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the Department of Labor and Industry intends to **repeal** regulations entitled: **16 VAC 15-20-10 et seq. Regulations Establishing a Multiple of Federal Minimum Hourly Wage Relating to Garnishment of Wages** and **adopt** regulations entitled: **16 VAC 15-21-10 et seq. Maximum Garnishment Amounts**. Section 34-29 of the Code of Virginia provides that the maximum amount which may be garnished by an employer is that amount by which an employee's disposable earnings for a week exceed 30 times the federal minimum hourly wage rate (F.M.W.R.) in effect at the time earnings are payable. That section also provides that an employer may not garnish more than 25% of disposable earnings in cases of ordinary debt. The section requires the Commissioner of Labor and Industry to establish equivalent maximum earnings which may be garnished by employers for other pay periods, such as biweekly, semimonthly, monthly, and longer than monthly pay periods.

The current regulation, 16 VAC 15-20-10 et seq., contains specific dollar figures based on the then-current F.M.W.R. Since 1970, the F.M.W.R. has increased several times, requiring the commissioner to repeatedly revise the regulation.

The commissioner proposed to repeal the current regulation and to replace it with a new regulation, proposed 16 VAC 15-21-10 et seq., Maximum Garnishment Amounts." The purpose of the replacement regulation is to clearly set forth the method for calculating the necessary amounts, but to omit specific dollar amounts. This new regulation will not make any substantive change to the previous method of calculating the maximum garnishment amounts. The

new regulation will simply and clearly state the method of calculation, and omit any specific dollar amounts as shown in the current regulation.

Statutory Authority: § 34-29 of the Code of Virginia.

Public comments may be submitted until November 30, 1998, to Bonnie Hopkins, Regulatory Coordinator, Department of Labor and Industry, 13 South 13th Street, Richmond, VA 23219.

TITLE 18. PROFESSIONAL AND OCCUPATIONAL LICENSING

BOARD OF OPTOMETRY

November 6, 1998 - 9 a.m. – Public Hearing
Department of Health Professions, 6606 West Broad Street, 5th Floor, Conference Room 3, Richmond, Virginia.

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the Board of Optometry intends amend regulations entitled: **18 VAC 105-30-10 et seq. Regulations Governing the Certification of Optometrists to Use Therapeutic Pharmaceutical Agents**. The amendments are proposed to specify the training and examination required, to establish a protocol for treatment of acute angle closure glaucoma, to review the renewal schedule from biennial to annual with a fee of \$75 (currently \$125 biennially), and to lower the application fee from \$300 to \$200.

Statutory Authority: §§ 54.1-2400 and 54.1-3223 of the Code of Virginia.

TITLE 16. LABOR AND EMPLOYMENT

DEPARTMENT OF LABOR AND INDUSTRY

Title of Regulation: **16 VAC 15-20-10 et seq. Regulations Establishing a Multiple of Federal Minimum Hourly Wage Relating to Garnishment of Wages (REPEALING).**

Title of Regulation: **16 VAC 15-21-10 et seq. Maximum Garnishment Amounts.**

Statutory Authority: § 34-29 of the Code of Virginia.

Public Hearing Date: October 20, 1998 - 2 p.m.

Public comments may be submitted until November 30, 1998.

(See Calendar of Events section for additional information)

Basis: Section 34-29(a)(2) of the Code of Virginia provides that the maximum amount which may be garnished by an employer is that amount by which an employee's disposable earnings for a week exceed 30 times the federal minimum hourly wage rate (F.M.W.R.) in effect at the time earnings are payable. That section also provides that an employer may not garnish more than 25% of disposable earnings in cases of ordinary debt. The section requires the Commissioner of Labor and Industry to establish equivalent maximum earnings which may be garnished by an employer for other pay periods, such as biweekly, semimonthly, monthly, and longer than monthly pay periods.

Purpose: The purpose of this regulation is to establish the method to calculate the legal maximum amounts which may be garnished for biweekly, semimonthly, monthly, and longer than monthly pay periods. Because the calculation of biweekly, semimonthly, and monthly equivalents to the weekly garnishment limitation might be disputed, this regulation provides a single authoritative method by which these equivalents are to be calculated. Thus the economic welfare of affected employees are protected by not having incorrect amounts garnished from their wages.

The agency promulgated a regulation in 1970. The 1970 regulation contained specific dollar amounts based on the then-current F.M.W.R. Thus, each time the F.M.W.R. increased the regulation needed to be revised. The purpose of this replacement regulation is to clearly set forth the method for calculating the necessary amounts, but to omit specific dollar amounts. The new regulation will assure that the commissioner will not have to promulgate a new regulation each time the F.M.W.R. changes.

Substance: The regulation establishes maximum amounts which may be garnished by employers for biweekly, semimonthly, monthly, and longer than monthly pay periods.

It makes no substantive change to the previous method of calculating these amounts. The regulation simply and clearly states the method of calculation, and omits the specific F.M.W.R. amounts currently in effect.

Issues: The only significant issue presented by this regulation is the assumption that each month consists of 4 and 1/3 (4.33330) work weeks. In making this assumption, the commissioner has followed the example of the federal government in parallel regulations promulgated by the federal government under the Fair Labor Standards Act. This method of calculating equivalent amounts has been in effect for many years both under Virginia and federal law.

The primary advantage to the public is that the new regulation establishes the maximum legal amounts which may be garnished by employers for biweekly, semimonthly, monthly, and longer than monthly pay periods. The department is aware of no disadvantage to the public.

The primary advantage to the agency is that the new regulation eliminates the repromulgation of the regulation every time the federal minimum wage is adjusted. There is no disadvantage to the agency.

Department of Planning and Budget's Economic Impact Analysis: The Department of Planning and Budget (DPB) has analyzed the economic impact of this proposed regulation in accordance with §9-6.14:7.1 G of the Administrative Process Act and Executive Order Number 13 (94). Section 9-6.14:7.1 G requires that such economic impact analyses include, but need not be limited to, the projected number of businesses or other entities to whom the regulation would apply, the identity of any localities and types of businesses or other entities particularly affected, the projected number of persons and employment positions to be affected, the projected costs to affected businesses or entities to implement or comply with the regulation, and the impact on the use and value of private property. The analysis presented below represents DPB's best estimate of these economic effects.

Summary of the proposed regulation. The proposed regulation would replace a regulation promulgated in 1970 that specified the specific dollar amounts that could be garnished from an employee's paycheck. The proposed regulation would replace these specific dollar amounts with a more general calculation method based on the federal minimum hourly wage rate. Currently, the regulation must be periodically repromulgated to adjust the fixed dollar amounts authorized for garnishment to take into account changes in the minimum wage. The proposed regulation would eliminate this necessity by indexing amounts authorized for garnishment to the federal minimum hourly wage rate.

Estimated economic impact. Theoretically, the primary economic consequence of the proposed regulation would be to speed the process for adjusting the amount of an employee's paycheck that is subject to garnishment. However, because the fixed dollar amounts contained in the current regulation have not been updated since 1970, current industry practice more closely reflects the requirements of § 34-29(a) of the Code of Virginia and the proposed regulation, than the requirements of the current regulation. As a result, implementation of the proposed regulation will only bring regulatory requirements into harmony with current practice and will have no actual economic consequences.

Businesses and entities particularly affected. The proposed change to this regulation will not have a significant economic impact on any particular businesses or entities.

Localities particularly affected. No localities are particularly affected by the proposed regulation.

Projected impact on employment. The proposed regulation is not anticipated to have a significant effect on employment.

Effects on the use and value of private property. The proposed regulation is not anticipated to have a significant effect on the use and value of private property.

Summary of analysis. The proposed regulation would replace the fixed garnishment amounts contained in the current regulation governing wage garnishment with a more general calculation method that indexes authorized garnishment amounts to the federal minimum hourly wage rate. Because the requirements of the proposed regulation reflect current industry practice, implementation of those requirements will have no actual economic consequences.

Agency's Response to the Department of Planning and Budget's Economic Impact Analysis: The Department of Labor and Industry accepts the analysis prepared by the Department of Planning and Budget.

Summary:

This regulation sets forth, for all types of pay periods, the method to calculate the maximum amount of disposable earnings which may be subject to garnishment, based on the federal minimum hourly wage rate in effect at the time the earnings are payable.

16 VAC 15-21-10. Definitions.

The following words and terms when used in this chapter shall have the following meanings unless the context clearly indicates otherwise:

"Disposable earnings" means that part of the earnings of any individual remaining after the deduction from those earnings of any amount required by law to be withheld.

"Earnings" means compensation paid or payable for personal services, whether denominated as wages, salary, commission, bonus, payments to an independent contractor, or otherwise, whether paid directly to the individual or

deposited with another entity or person on behalf of and traceable to the individual, and includes periodic payments pursuant to a pension or retirement program.

"F.M.W.R." means the current federal minimum hourly wage rate set out in the Fair Labor Standards Act, 29 USC § 206(a)(1) or its successor, and any regulations promulgated thereunder.

"Garnishment" means any legal equitable procedure through which the earnings of any individual are required to be withheld for payment of any debt.

"Ordinary debt" means any debt other than a debt for the support of a person or a debt for taxes, or any other debt for which a different maximum garnishment amount is established by law.

15 VAC 15-21-20. Maximum garnishment amounts to satisfy an ordinary debt.

A. No more than 25% of disposable earnings in any pay period may be garnished to satisfy an ordinary debt.

B. A garnishment for an ordinary debt may not reduce disposable earnings for a week to an amount less than the F.M.W.R. times 30; may not reduce disposable biweekly earnings to an amount less than the F.M.W.R. times 30 times 2; may not reduce disposable semimonthly earnings to an amount less than the F.M.W.R. times 30 times 2.16665; may not reduce disposable monthly earnings to an amount less than the F.M.W.R. times 30 times 4.33330; and may not reduce disposable earnings for a period of more than a month to an amount less than the F.M.W.R. times 30 times the number of weeks worked. The number of weeks worked shall be calculated by dividing the total number of days in the period worked by 7, calculated to 4 decimal places.

15 VAC 15-21-30. Calculation of maximum garnishment amounts for an ordinary debt.

A. Weekly earnings.

1. If the amount of weekly disposable earnings equals 30 times the F.M.W.R. or less, nothing may be withheld for garnishment.

2. If the amount of weekly disposable earnings equals more than 30 times the F.M.W.R., but is less than 40 times the F.M.W.R., then the amount above 30 times the F.M.W.R. may be withheld for garnishment.

3. If the weekly disposable earnings equals or exceeds 40 times the F.M.W.R., or more, then a maximum of 25% of the disposable earnings may be withheld for garnishment.

B. Biweekly earnings. The maximum amount which may be withheld for garnishment from biweekly earnings shall be calculated in the same manner as described for weekly earnings in subsection A of this section, except that the corresponding weekly amounts in subdivisions A 1, A 2 and A 3 of this section shall be multiplied by 2.

Proposed Regulations

C. *Semimonthly earnings.* The maximum amount which may be withheld for garnishment from semimonthly earnings shall be calculated in the same manner as described for weekly earnings in subsection A of this section, except that the corresponding weekly amounts in subdivisions A 1, A 2 and A 3 of this section shall be multiplied by 2.16665.

D. *Monthly earnings.* The maximum amount of monthly disposable earnings which may be withheld for garnishment shall be calculated in the same manner as weekly earnings in subsection A of this section, except that the corresponding weekly amounts in subdivisions A 1, A 2, and A 3 of this section shall be multiplied by 4.33330.

E. *Earnings for a period of more than one month.* The maximum amount which may be withheld in garnishment for work periods in excess of one month shall be calculated in the same manner as described for weekly earnings in subsection A of this section, except that the corresponding weekly amounts in subdivisions A 1, A 2 and A 3 of this section shall be multiplied by the number of weeks worked. The number of weeks worked shall be calculated by dividing the total number of days in the period worked by 7, calculated to 4 decimal places.

TITLE 18. PROFESSIONAL AND OCCUPATIONAL LICENSING

BOARD OF OPTOMETRY

Title of Regulation: 18 VAC 105-30-10 et seq. **Regulations for the Certification of Optometrists to Use Therapeutic Pharmaceutical Agents (amending 18 VAC 105-30-10, 18 VAC 105-30-20, 18 VAC 105-30-30, 18 VAC 105-30-40, 18 VAC 105-30-60, 18 VAC 105-30-70, 18 VAC 105-30-90, 18 VAC 105-30-100 and 18 VAC 105-30-120; adding 18 VAC 105-30-35; repealing 18 VAC 105-30-50 and 18 VAC 105-30-110).**

Statutory Authority: §§ 54.1-2400 and 54.1-3223 of the Code of Virginia.

Public Hearing Date: November 6, 1998 - 9 a.m.

Public comments may be submitted until November 27, 1998.

(See Calendar of Events section for additional information)

Basis: Chapter 24 (§ 54.1-2400 et seq.) and Chapter 32 (§ 54.1-3200 et seq.) of the Code of Virginia provide the basis for this regulation.

Chapter 24 establishes the general powers and duties of the health regulatory boards including the power to establish qualifications for licensure and the responsibility to promulgate regulations.

Article 5 (§ 54.1-3222 et seq.) of Chapter 32 establishes the authority for the Board of Optometry to issue certification for optometrists to administer therapeutic pharmaceutical agents (TPA's) for the treatment of certain diseases or abnormal conditions of the eye. Article 5 also empowers the board to establish regulations relating to education and examination and to make determinations of the diseases, treatment guidelines and drugs to be specified on the TPA-Formulary.

Purpose: The purpose of these regulations is to establish criteria for certification of optometrists to administer therapeutic pharmaceutical agents by examination, a process for applicants to follow, and requirements for renewal and fees. Appropriate practice standards are essential for the health, safety, and welfare of patients who will be treated by optometrists with therapeutic pharmaceutical agents in the Commonwealth.

Substance:

18 VAC 105-30-10. Proposed amendments eliminate definitions which are not used in regulation (such as "invasive modality") or are unnecessary to the understanding of the rules (such as "examination").

18 VAC 105-30-30. Amendments are proposed to eliminate a requirement to send certain documents which the board would already have on file (such as evidence of licensure and authority to use DPA's).

18 VAC 105-30-35. The current requirement for postgraduate education has been determined by the board and very specifically stated in 18 VAC 105-30-110 which is being repealed. 18 VAC 105-30-35 sets out that requirement without specifying one postgraduate program.

18 VAC 105-30-40. Proposed amendments delete unnecessary language and clarify that the required examination for TPA certification in TMOD.

18 VAC 105-20-50. The board proposes to repeal this section as it is redundant of the Code of Virginia.

18 VAC 105-30-60. Amendments are proposed to specify the protocol for treatment of acute angle closure glaucoma to include limitations on treatment modalities and requirements for referral.

18 VAC 105-30-90. A proposed amendment would revise the renewal schedule for TPA certification to make it concurrent with renewal of the license to practice optometry.

18 VAC 105-30-110. This section is repealed as the requirements for postgraduate education are more simply stated in 18 VAC 105-30-35.

18 VAC 105-30-120. The board proposes to reduce the application fee from \$300 to \$200, to change the renewal fee from \$125 biennially to \$75 annually (in conformity with the annual licensure renewal), to reduce the penalty fee for reinstating an expired license from \$125 to \$50, and to add a fee of \$15 for a returned check.

Issues:

Issue #1: Education and examination requirements. The postgraduate training for TPA certification in Part VI of current regulations is established as the Ocular Therapy for the Optometric Practitioner #750B conducted by the Pennsylvania College of Optometry or any other postgraduate program approved by the board. No other specific program has been approved to date. The board considered the criteria which it would accept for approval and proposes to establish those criteria by regulation and delete the reference to a specific program in one college of optometry.

The licensure examination of the National Board of Optometry now includes in Part III the "Treatment and Management of Ocular Disease" (TMOD), which is designed to certify the competency of applicants in the use of TPA's. Proposed regulations would specify that TMOD is the board's approved examination for certification.

Advantages or disadvantages to licensees: The proposed amendments will clarify the requirements as consistent with current law in Virginia which requires the Board of Optometry to establish the minimal qualifications for TPA certification. The establishment of requirements for an approved course of study will provide guidance to optometrists who may want to prepare for certification in Virginia. The identification of TMOD as the acceptable examination will also provide clarity about requirements.

There are no disadvantages, since the educational and examination criteria are the same as is currently accepted by the board.

Advantages or disadvantages to the public: There should be an advantage to the public who will be assured that all optometrists certified to administer TPA's will be adequately trained and tested.

Issue #2: Treatment protocol for acute angle closure glaucoma. Under current regulations, licensees are allowed to treat glaucoma with prior consultation with the patient's physician. Treatment of angle closure glaucoma, which may occur suddenly and acutely is limited to the initiation of immediate emergency care. The problem has been that the current listing of permissible drugs is not sufficient to adequately treat the emergency. The proposed regulations would establish the protocol to be followed to include administration of certain oral medications, initiation of topical medications and referral to an ophthalmologist.

Advantages or disadvantages to licensees: Under the proposed regulations, licensees will have the ability to treat the emergency situation present when a diagnosis of acute angle closure glaucoma is made. The optometrist will not be hampered by unnecessarily restrictive regulations but will be able to initiate appropriate treatment immediately.

Advantages or disadvantages to the public: The public is better protected and better served by proposed regulations which allow the optometrist to treat an emergency condition, which without prompt action could cost someone their eyesight.

Issue #3: Changes to renewal schedule and fees. Proposed regulations would put renewal of an optometrist license and certification for TPA on the same annual renewal schedule. The current schedule is different because TPA certification was initially granted under the Board of Medicine, and renewals followed the biennial schedules for that board. The current fee for biennial renewal is \$125; the proposed fee would be \$75, which is slightly higher. The current fee for reinstating an expired license is \$125; the proposed penalty fee for late renewal is \$50.

The current application fee was also established by the Board of Medicine at \$300; the proposal by the Board of Optometry is a \$200 application fee.

Advantages or disadvantages to licensees: Under the proposed regulations, there will be less confusion for licensees with TPA certification who will be able to renew all licenses at the same time. The disadvantage is that there is a modest increase in the renewal fee over a two-year period from the current fee of \$125 per biennium to a proposed fee of \$75 each year.

On the other hand, persons seeking TPA certification will benefit by a reduction from \$300 to \$200 for an application and initial certification. Persons who allow their certification to expire will also pay a reduced fee to reinstate a lapsed certificate.

Advantages or disadvantages to the public: There are no advantages or disadvantages to the public.

Estimated Impact:

A. Projected number of persons affected and their cost of compliance:

Licensed optometrists	1,285
TPA certified optometrists	650

The current application fee was established by the Board of Medicine at \$300; the proposal by the Board of Optometry is a \$200 application fee. For the 75 to 100 optometrists who apply for TPA certification each year, there will be a savings of \$100. The reduced fee may encourage some optometrists to seek the additional certification which will increase the treatment options and qualifications offered to patients.

Proposed regulations would put renewal of an optometrist license and certification for TPA on the same annual renewal schedule. The current schedule is different because TPA certification was initially granted under the Board of Medicine, and renewals followed the biennial schedules for that board. The current fee for biennial renewal is \$125; the proposed fee would be \$75, which would be an increase of \$25 over a two-year period for the 650 optometrists who have TPA certification.

For the five to 10 optometrists who allow their TPA certification to lapse at renewal, there will be a penalty fee of \$50 for a late renewal. For the one or two licensees who have their checks returned for insufficient funds, there will be a cost of \$15 for handling.

B. Cost to the agency for implementation:

The board will incur approximately \$1,000 in cost for printing and mailing Notices of Comment and final amended regulations to licensees and other interested parties. There will be no additional cost for conducting a public hearing, which will be held

Proposed Regulations

in conjunction with a scheduled board meeting. The board does not anticipate any additional costs for investigations or administrative proceedings against licensees for violations of these regulations.

C. Cost to local governments:

These regulations will not impact local government.

Department of Planning and Budget's Economic Impact Analysis: The Department of Planning and Budget (DPB) has analyzed the economic impact of this proposed regulation in accordance with § 9-6.14:7.1 G of the Administrative Process Act and Executive Order Number 13 (94). Section 9-6.14:7.1 G requires that such economic impact analyses include, but need not be limited to, the projected number of businesses or other entities to whom the regulation would apply, the identity of any localities and types of businesses or other entities particularly affected, the projected number of persons and employment positions to be affected, the projected costs to affected businesses or entities to implement or comply with the regulation, and the impact on the use and value of private property. The analysis presented below represents DPB's best estimate of these economic impacts.

Summary of the proposed regulation. The Board of Optometry has proposed the following changes to the existing regulations that govern the certification of optometrists to use therapeutic pharmaceutical agents (TPA's):

1. Deletion of unessential language and elimination of unnecessary application requirements.
2. Rewording of the post-graduate education requirements to list general criteria rather than specify one post-graduate program, as is currently done.
3. Establishment of the "Treatment and Management of Ocular Disease" portion of the National Board of Optometry's licensure examination as the required exam for TPA certification in Virginia.
4. Revision of the renewal schedule from a biennial fee of \$125 to an annual fee of \$75.
5. Reduction of the application fee for TPA certification from \$300 to \$200, and the reduction of the penalty fee for reinstatement of an expired license from \$150 to \$50.
6. Establishment of the protocol for the initiation of emergency treatment of acute angle closure glaucoma.

Estimated economic impact. In 1996, the General Assembly transferred the authority for TPA certification from the Board of Medicine to the Board of Optometry. Several of the proposed changes are intended to address issues that arose from the transfer. For example, the proposal eliminates the requirement for the submission of certain documents and verification from the Board of Optometry (to the Board of Medicine) which are no longer needed. The proposal also rewords the educational requirements to set forth general criteria for post-graduate programs as opposed to specifying one particular course, as is currently the case. These

changes will not alter the application or educational criteria currently accepted by the Board of Optometry and therefore are not expected to have any economic effects.

Prior to the transfer of TPA certification oversight in 1996, the Board of Medicine administered a specific exam for TPA certification. Since 1993, the national optometry licensure exam has included a section on the "Treatment and Management of Ocular Diseases" (TMOD), which had comparable content to the Board of Medicine's exam. When the Board of Optometry took over TPA certification oversight, it chose to use the TMOD as the certification examination, thereby eliminating a redundant requirement. The Board of Optometry now proposes to clarify their current practice and establish the TMOD as the required exam for TPA certification in Virginia. The board also proposes to reduce the application fee for TPA certification from \$300 to \$200 since that fee no longer requires the administration of an examination. These changes will result in net cost savings of between \$7,500 to \$10,000 a year.¹ The lower application fee may also encourage more optometrists to seek the additional certification, thereby increasing the treatment options and qualifications offered to patients.

The board proposes to revise the renewal schedule for TPA certification from a biennial fee of \$125 to an annual fee of \$75. This will benefit optometrists who hold TPA certificates by putting the renewal of an optometrist license and certification for TPA on the same annual renewal schedule. The board proposes to increase the renewal fee by \$12.50 per year to cover the additional duties the board has taken on by the transfer of TPA certification from the Board of Medicine. This will result in a net increase in compliance costs of \$8,125 per year.² For the five to 10 optometrists who allow their TPA certification to lapse at renewal, the board proposes to reduce the penalty fee for a late renewal from \$150 to \$50.

Emergency treatment of acute angle closure glaucoma. Legislation was passed during the 1996 General Assembly session that allows optometrists to initiate emergency treatment for acute angle closure glaucoma. The majority of individuals develop this condition during everyday activities which dilate the eyes (e.g., movie theaters, nighttime) and go directly to a doctor's office or hospital emergency room due to severe eye pain and gastro-intestinal symptoms. In rare instances, though, a patient may develop acute angle closure glaucoma while undergoing the pathological (disease diagnosis) stage of an optometric examination, or shortly thereafter, during which the eyes are dilated.

The proposed regulations would establish a protocol to be followed to allow TPA certified optometrists to initiate limited emergency treatment of this condition which is then immediately referred to an ophthalmologist. The educational

¹ The Board of Optometry estimates that 75 to 100 optometrists apply for TPA certification each year. The proposed application fee reduction will save each of those individuals \$100.

² There are currently 650 TPA certified optometrists. 650 * \$12.50 per year = \$8,125 per year.

requirements for TPA certified optometrists include specific training in the diagnosis, treatment, and management of acute angle closure glaucoma and these issues are addressed in detail in the TMOD, the required examination for TPA certification.³ The TPA-Formulary Committee⁴ has reviewed this proposal and had no objection the use of certain oral medications by TPA certified optometrists in the emergency treatment of acute angle closure glaucoma.

There are potential risks associated with the drugs used to initiate emergency treatment of acute angle closure glaucoma, including death, although exact probabilities are unavailable at this time.⁵ TPA certified optometrists are currently allowed to treat acute angle closure glaucoma with topical solutions which also have a small probability of causing severe adverse reactions, including death, as can some of the drugs used to dilate eyes during an optometric examination.⁶

While there are potential risks associated with its treatment, acute angle closure glaucoma progresses very quickly and the extent of eyesight lost depends on the length of time before treatment is initiated. Patients may benefit from this proposal if diagnosis and emergency treatment by an optometrist is performed sooner than obtaining diagnosis and treatment by an ophthalmologist. This may specifically be the case for patients who develop this condition while undergoing an optometric examination or for patients in rural areas where ophthalmologists are not as numerous.

While an exact measurement of the potential risks and benefits of this proposal is not available at this time, it is expected that the potential risks will not outweigh the likely benefits of allowing trained TPA-certified optometrists to initiate limited emergency treatment procedures that could save some or all of an individual's eyesight.

Businesses and entities affected. This proposal will affect the 650 optometrists who are currently TPA certified and all future applicants.

Localities particularly affected. As discussed above, the proposed regulation potentially could disproportionately benefit individuals in rural areas who develop acute angle closure glaucoma by allowing diagnosis and initial treatment of the condition to be performed by a TPA certified

optometrist sooner than obtaining diagnosis and treatment by an ophthalmologist.

Projected impact on employment. The proposed regulation is not expected to have any significant effect on employment.

Effects on the use and value of private property. The proposed regulation is not expected to have any significant effect on the use and value of private property.

Summary of analysis. The proposed regulation does not change the application, education, or examination criteria for TPA certification currently accepted by the board. The proposal eliminates a redundant exam and reduces the application fee accordingly, resulting in a net cost savings of between \$7,500 to \$10,000 each year for the pool of new applicants. The proposal establishes the protocol for the treatment of acute angle closure glaucoma by TPA certified optometrists and results in a net benefit for patients who develop this disease while undergoing an optometric examination and potentially for patients in rural areas. The proposal increases the aggregate compliance costs borne by TPA certified optometrists by \$8,125 per year.

Agency's Response to the Department of Planning and Budget's Economic Impact Analysis: The agency concurs with the analysis of the Department of Planning and Budget.

Summary:

Amendments to these regulations are proposed to specify the type of training and the portion of the national examination necessary for an optometrist to be certified to use therapeutic pharmaceutical agents. Amendments would also establish a protocol for treatment of acute angle closure glaucoma, revise the renewal schedule from biennial to annual (consistent with the renewal of the optometrist's license) with a fee of \$75 (currently the fee is \$125 biennially), and would lower the application fee from \$300 to \$200. All changes are proposed to provide quality optometric services available as are consistent with the public health, safety and welfare.

PART III. EXAMINATION.

18 VAC 105-30-40. Examination for certification.

~~The following general provisions shall apply to optometrists who apply to take the board's examination for certification to prescribe for and treat certain diseases, including abnormal conditions, of the human eye and its adnexa with certain therapeutic pharmaceutical agents.~~

~~A. The TPA certification examination for an optometrist to prescribe for and treat certain diseases, including abnormal conditions, of the human eye and its adnexa with certain therapeutic pharmaceutical agents shall be in one part Treatment and Management of Ocular Disease (TMOD) of the National Board of Optometric Examiners or any other examination as approved by the board.~~

~~B. A candidate for certification by the board who fails the examination following three attempts shall take complete additional postgraduate training approved by the board as required in 18 VAC 105-30-35 to be eligible to take further examinations, as required in 18 VAC 105-30-110.~~

18 VAC 105-30-50. Certification. (Repealed.)

~~An optometrist, currently licensed by the Board of Optometry, who has completed didactic and clinical training to ensure an appropriate standard of medical care for the patient and has met all other requirements and has passed an examination administered by the board, shall be certified to administer and prescribe certain therapeutic pharmaceutical agents in the treatment of certain diseases,~~

~~including abnormal conditions, of the human eye and its adnexa.~~

18 VAC 105-30-60. Treatment guidelines.

A. TPA certified optometrists may treat diseases and abnormal conditions of the following structures of the human eye and its adnexa which may be appropriately treated with pharmaceutical agents as referenced in 18 VAC 105-30-70:

1. Lids and adnexa;
2. Lacrimal system;
3. Cornea;
4. Conjunctiva; and
5. Episclera.

B. In addition, the following may be treated:

1. Glaucoma (with prior consultation with the patient's physician or other appropriate physician and excluding the treatment of congenital and infantile glaucoma). Treatment of angle closure shall ~~be limited to the initiation of immediate emergency care with pharmaceutical agents as referenced in 18 VAC 105-30-70~~ follow the protocol prescribed in subsection C of this section.
2. Ocular-related post-operative care in cooperation with patient's surgeon.
3. Ocular trauma to the above tissues as in subsection A of this section.
4. Uveitis, anterior.
5. Anaphylactic shock (limited to the administration of intramuscular epinephrine).

C. *The protocol for treatment of acute angle closure glaucoma shall be as follows:*

1. *Treatment shall be limited to the initiation of immediate emergency care with appropriate pharmaceutical agents as prescribed by this chapter;*
2. *Once the diagnosis of acute angle closure glaucoma has been established by the optometrist, the ophthalmologist to whom the patient is to be referred should be contacted immediately;*
3. *If there are no medical contraindications, an oral osmotic agent may be administered as well as an oral carbonic anhydrase inhibitor and any other medically accepted, Schedule VI, oral antiglaucomic agent as may become available; and*
4. *Proper topical medications as appropriate may also be administered by the optometrist.*

18 VAC 105-30-70. Therapeutic pharmaceutical agents.

A. A certified optometrist may procure for administration, administer and prescribe the following topically applied pharmaceutical agents (Schedule VI) or any therapeutically appropriate combination thereof. For clarification and

reference, the list of approved topical preparations shall be those listed under "Topical Preparations," subsection "Ophthalmic Products" in the current edition of Drug Facts and Comparisons Updated Monthly as it is updated. (A copy of the current approved list will be provided upon request from the Board of Optometry.)

1. Anti-allergy;
2. Anti-glaucoma;
3. Anti-infective;
4. Anti-inflammatory;
5. Cycloplegic and Mydriatic; and
6. Decongestant.

B. A certified optometrist may procure for administration, administer, or prescribe the following oral pharmaceutical agents: narcotic and nonnarcotic analgesics limited to Schedule III and VI. For clarification and reference, Schedule III analgesics shall be those oral analgesic preparations containing codeine or hydrocodone in combination with ~~other~~ nonnarcotic analgesics. Further, the following list of Schedule VI oral analgesic preparations are approved:

Schedule VI oral analgesics:

Nonsteroidal anti-inflammatory drugs:

- ibuprofen
- ketoralac
- nabumetone
- naproxen sodium
- etodolac
- ketoprofen
- diclofenac sodium or diclofenac potassium
- fenoprofen or fenoprofen calcium

Centrally acting analgesics:

- tramadol hydrochloride

C. Over-the-counter topical and oral medications appropriate to the treatment of the eye may be procured for administration, administered, prescribed or dispensed.

D. A certified optometrist may prescribe and dispense contact lenses for therapeutic purposes.

E. *A TPA-certified optometrist may inject epinephrine intramuscularly for anaphylactic shock.*

18 VAC 105-30-90. Renewal of certification.

Every optometrist TPA-certified by the board shall renew his certification ~~biennially on or before July 1 and pay the prescribed fee in 18 VAC 105-30-120 in each odd number year~~ with the annual renewal of his license to practice optometry.

18 VAC 105-30-100. Expiration of certification.

An optometrist who allows his certification to expire shall be considered not certified by the board. An optometrist who proposes to resume the treatment of certain diseases,

DEPARTMENT OF GENERAL SERVICES

Division of Purchases and Supply

REGISTRAR'S NOTICE: The following regulation was filed by description with the Registrar of Regulations in accordance with § 2.3 of the Virginia Code Commission Regulations Implementing the Virginia Register Act. Section 2.3 of the Virginia Code Commission regulations allows the Registrar to authorize the filing of a regulatory document by description in lieu of filing the entire text pursuant to criteria identified in that section.

Title of Regulation: 1 VAC 30-130-10. **Agency Procurement and Surplus Property Manual.**

Statutory Authority: § 2.1-442 of the Code of Virginia.

Effective Date: September 15, 1998.

Exemptions Claimed:

This regulation is exempt from the Administrative Process Act pursuant to § 9-6.14:4.1 B 2 of the Code of Virginia, which exempts agency action involving regulations for the award or denial of state contracts, as well as decisions regarding compliance therewith. Subdivision 2 f of § 2.3 of the Virginia Code Commission Regulations allows regulations concerning public contracts to be filed by description subject to the authorization of the Registrar of Regulations.

Summary:

The Agency Procurement and Surplus Property Manual is published under the authority of § 2.1-442 of the Code of Virginia, and sets forth the policies and procedures to be followed by state agencies and institutions in fulfilling procurement responsibilities within their delegated limits. In addition, the Division of Purchases and Supply of the Department of General Services may from time to time issue directives or memoranda which are effective until included in a revision to the manual or rescinded. The September 15, 1998, edition supersedes all previous editions and changes thereto.

TITLE 12. HEALTH

DEPARTMENT OF MEDICAL ASSISTANCE SERVICES

REGISTRAR'S NOTICE: Pursuant to § 9-6.14:9 E (ii) of the Code of Virginia, the Department of Planning and Budget has filed a revised economic impact analysis for the Specialized Care Nursing Facility Services amendments. The revised analysis is printed below. The initial economic impact analysis filed pursuant to § 9-6.14:7.1 G was printed with the proposed regulation in 14:12 VA.R. 1899-1910 March 2, 1998. Please see 14:26 VA.R. 4252-4266 September 14, 1998, for the final amendments on which this revised analysis is based. The amendments are scheduled to become effective on October 15, 1998.

Title of Regulation: Specialized Care Nursing Facility Services.

12 VAC 30-20-10 et seq. Administration of Medical Assistance Services (amending 12 VAC 30-20-170).

12 VAC 30-50-10 et seq. Amount, Duration and Scope of Medical and Remedial Care Services (amending 12 VAC 30-50-160).

12 VAC 30-60-10 et seq. Standards Established and Methods Used to Assure High Quality Care (amending 12 VAC 30-60-40, 12 VAC 30-60-320, and 12 VAC 30-60-340).

12 VAC 30-90-10 et seq. Methods and Standards for Establishing Payment Rates for Long-Term Care (amending 12 VAC 30-90-264 and 12 VAC 30-90-290).

Statutory Authority: § 32.1-325 of the Code of Virginia.

Effective Date: October 15, 1998.

Revised Economic Impact Analysis Prepared by the Department of Planning and Budget: The Department of Planning and Budget (DPB) has analyzed the economic impact of this proposed regulation in accordance with § 9-6.14:7.1 G of the Administrative Process Act and Executive Order Number 13 (94). Section 9-6.14:7.1 G requires that such economic impact analyses include, but need not be limited to, the projected number of businesses or other entities to whom the regulation would apply, the identity of any localities and types of businesses or other entities particularly affected, the projected number of persons and employment positions to be affected, the projected costs to affected businesses or entities to implement or comply with the regulation, and the impact on the use and value of

private property. The analysis presented below represents DPB's best estimate of these economic impacts.

Summary of the proposed regulation. In response to public comment, DMAS reviewed the specialized care providers rules for wound care. DMAS proposes to eliminate the subcategory of wound care from the specialized care program and to change the rules for durable medical equipment. The change will result in wound care being covered at the regular nursing facility rate but would expand the coverage of specialized beds. This will facilitate the treatment of pressure ulcers at standard nursing facilities.

Estimated economic impact. DMAS has presented persuasive evidence that the current practice of paying for specialized care for the treatment of pressure ulcers is resulting in slower recovery rates among patients with this condition. This may have resulted in both increased costs and in increased pain and discomfort for patients. Due to the higher rates of compensation for the treatment of pressure ulcers at specialized treatment centers, these care providers do not have a strong economic incentive to aggressively treat this condition. DMAS presents evidence that makes a strong case that this compensation method has resulted in much longer treatment times for pressure ulcers in Virginia than in states that do not give specialized care compensation for the treatment of pressure ulcers. Nursing facilities will have a substantial incentive to prevent and aggressively treat pressure ulcers because their compensation rate will not increase when a patient develops this condition.

The figures given by DMAS indicate that, even if the standard for specialty beds is relaxed to allow these beds to be used in the treatment of pressure ulcers at standard nursing facilities, there should be a net cost savings. However, the economic value of the reduction in pain and suffering resulting from the expected reduction in required treatment times is likely to substantially increase any cost savings that might be expected. By DMAS figures, we should expect the treatment days to fall from just over 150 to about 80, under the new rule. For each patient, then, we can expect a reduction in the number of days with severe pressure ulcers to drop by 70. Assuming conservatively that a patient values the absence of severe pressure ulcers at between \$20 and \$100 per day, the economic value to the patient of improved care would be between \$1,400 and \$7,000. With approximately 224 patients treated for severe pressure ulcers in 1997, this would have an aggregate economic value of from \$314,000 to \$1,570,000. While it is unlikely that patients would value the elimination of pressure ulcers at less than \$20 per day, it may be that some patients would value this at more than \$100 per day.

This leads to the conclusion that the changes proposed by DMAS would enhance the economic value of the proposed regulation.

Businesses and entities affected. DMAS indicates that there are 51 facilities currently offering specialized care services. These businesses will no longer receive specialized care rates for treating severe pressure ulcers.

Localities particularly affected. No localities are particularly affected by these changes.

Projected impact on employment. It is unlikely that these changes will result in any changes in employment in Virginia.

Effects on the use and value of private property. While this proposal does change certain rules pertaining to the operation of specialized care nursing facilities, it is unlikely that there will be any significant net change in the value of ownership interests in these facilities. It is possible that one or more specialized care establishments previously performing these services will lose some revenue due to a shift of the care to nursing facilities. Nursing facilities not providing specialized care will have somewhat increased demand for their services. It is not known whether the impact of this change will be large enough to change the value of ownership of these facilities.

Summary of analysis. These regulations can be expected to produce a net economic benefit for Virginia.

Agency's Response to the Revised Economic Impact Analysis Prepared by the Department of Planning and Budget: While DMAS concurs with the latest fiscal analysis from the Department of Planning and Budget, the agency is most gratified by DPB's recognition of the quality of care issues addressed by the revised final regulation.

STATE WATER CONTROL BOARD

Proposed Consent Special Order Alleghany County for Clearview Estates/Clearwater Park Pump Station

The State Water Control Board and the Department of Environmental Quality propose to issue a Consent Special Order to Alleghany County for unpermitted discharges at the pump station serving Clearview Estates and Clearwater Park. This is the portion of Alleghany County that is connected to the Covington Sewage Treatment Plant through the Dry Run Pump Station. The order includes a schedule for correcting excessive inflow and infiltration into the sewer lines, a moratorium on new connections, and a civil charge of \$1,500.

On behalf of the State Water Control Board, the Department of Environmental Quality will receive written comments relating to the proposed action until October 28, 1998. Comments should be addressed to James F. Smith, West Central Regional Office, Department of Environmental Quality, 3019 Peters Creek Road, NW, Roanoke, VA 24019, or fax 540-562-6725, and should refer to the specific order being addressed. The proposed order may be examined at the Department of Environmental Quality, West Central Regional Office, 3019 Peters Creek Road, NW, Roanoke, VA. Copies of the order may be obtained in person or by mail.

Proposed Consent Special Order AlliedSignal, Inc. - Hopewell Plant

The State Water Control Board proposes to take an enforcement action against AlliedSignal Inc. The owner has agreed to settle the matter of alleged VPDES permit violations at its facility in Hopewell. The proposed order requires that the company take corrective measures, including piping replacement and enhanced piping inspections. It also requires a comprehensive reassessment

of the facility's acutely toxic chemical spill readiness. The order requires that a \$50,000 civil charge be paid, as well as reimbursement to the department for \$408.81 in investigative costs and \$1,293.72 in fish replacement costs to the Department of Game and Inland Fisheries.

The settlement includes \$35,000 for a Supplemental Environmental Project (SEP), toward woodland and wetland acquisition in cooperation with the Nature Conservancy in Sussex County for the establishment of a Habitat Conservation Plan for the preservation of Virginia's last population of the federally endangered Red-Cockaded Woodpecker; \$5,000 for a SEP for the purchase of inholding property in the James River National Wildlife Refuge, in cooperation with the U.S. Fish and Wildlife Service; and in cooperation with the James River Association, \$60,000 for a SEP toward the improvement of water quality and critical habitat restoration and protection along 25 miles of the Lower James River.

On behalf of the State Water Control Board, the Department of Environmental Quality will receive written comments relating to the special order until October 28, 1998. Comments should be addressed to Amy Thatcher Clarke, Department of Environmental Quality, 629 East Main Street, Richmond Virginia 23219, and should refer to the consent special order.

The proposed order may be examined at the same address. A copy of the order may also be obtained in person or by mail.

Proposed Consent Special Order Capitol Region Airport Commission

The State Water Control Board proposes to issue a Consent Special Order to Capitol Region Airport Commission for the Richmond International Airport located in Henrico County. The proposed order requires the Capitol Region Airport Commission to submit an approvable conceptual plan and schedule of activities for wetland creation to address forested wetland impacts; and to submit an approvable final mitigation plan to address forested wetland impacts. In addition, the order requires the payment of a \$6,000 civil charge for failure to comply with the previously issued VWP permit.

On behalf of the State Water Control Board, the Department of Environmental Quality will receive for 30 days from the date of publication of this notice written comments relating to the proposed consent special order. Comments should be addressed to Cynthia Akers, Department of Environmental Quality, Piedmont Regional Office, 4949-A Cox Road, Glen Allen, Virginia 23060-6295. A copy of the order may be obtained in person or by mail from the above office.

Proposed Consent Special Order Town of Culpeper Wastewater Treatment Plant

The State Water Control Board proposes to issue a Consent Special Order to the Town of Culpeper (permittee) regarding the wastewater treatment plant (plant), located in Culpeper County, Virginia.

The plant is subject to VPDES Permit No. VA0061590. The order provides that the permittee submit a plan and schedule to address inflow and infiltration problems, submit a revised operation and maintenance manual and a toxicity reduction evaluation plan. The permittee has agreed to the issuance of the order.

On behalf of the board, the Department of Environmental Quality's Northern Virginia Regional Office will accept written comments relating to the order through October 28, 1998. Please address comments to Vanessa Dao, Northern Virginia Regional Office, Department of Environmental Quality, 13901 Crown Court, Woodbridge, Virginia 22193. Proposed Consent Special Order Hercules, Incorporated

The State Water Control Board proposes to take an enforcement action against Hercules, Incorporated. The proposed enforcement action is a consent special order that will require Hercules, Incorporated to come into compliance with their VPDES Permit. This action is being taken as a result of exceedances of their permit effluent limitations for total suspended solids. In addition, the proposed order contains a civil charge of \$59,000, \$19,400 of which may be offset by the performance of a supplemental environmental project. The proposed project is the funding of a large scale emergency drill by the Franklin-Southampton County Local Emergency Planning Commission.

The Department of Environmental Quality will receive written comments relating to the board's proposed consent special order from September 28, 1998, to October 28, 1998. Comments should be addressed to David S. Gussman, Department of Environmental Quality, Tidewater Regional Office, 5636 Southern Boulevard, Virginia Beach, Virginia 23462, and should refer to the order specified above. The proposed order may be examined at the above address and copies of the order may be obtained in person or by mail.

Proposed Amendments to a Consent Special Order King George County Board of Supervisors Elementary and High School Lagoon

The State Water Control Board proposes to amend a Consent Special Order issued to the King George County Board of Supervisors (permittee) regarding the King George County Elementary and High School Lagoon on December 2, 1997.

The facility is subject to VPDES Permit No. VA0027570. The amendment incorporates interim effluent limits for ammonia until December 1, 1998, when the lagoon is scheduled to be taken off line. The permittee has agreed to the issuance of the order.

On behalf of the board, the Department of Environmental Quality's Northern Virginia Regional Office will receive written comments relating to the amended order through October 28, 1998. Please address comments to Elizabeth Anne Crosier, Northern Virginia Regional Office, Department of Environmental Quality, 13901 Crown Court, Woodbridge, Virginia 22193. Please write or visit the Woodbridge address, or call (703) 583-3886 to examine or obtain a copy of the order.

Proposed Consent Special Order Madison County School Board

The State Water Control Board proposes to issue a Consent Special Order to Madison County School Board (permittee) regarding the wastewater treatment plants for the Madison County Elementary, Primary and High Schools, located in Madison County, Virginia.

The plants are subject to VPDES Permit Nos. VA0062944, VA0060836 and VA0020109. The order provides, among other things, that the permittee connect all sewage lines from the Madison County Schools to the Rapidan Service Authority Madison Sewage Treatment Plant. The permittee has agreed to the issuance of the order.

On behalf of the board, the Department of Environmental Quality's Northern Virginia Regional Office will accept written comments relating to the order through October 28, 1998. Please address comments to Vanessa Dao, Northern Virginia Regional Office, Department of Environmental Quality, 13901 Crown Court, Woodbridge, Virginia 22193. Please write or visit the Woodbridge address, or call (703) 583-3863 to examine or obtain a copy of the order.

Proposed Consent Special Order Pine Street Village, L.P.

The State Water Control Board proposes to issue a Consent Special Order to Pine Street Village, L.P. with regard to the Pine Street Village Apartments located at Wakefield, Virginia. The proposed order requires the payment of a \$50,000 civil charge for violations of the VPDES permit for the wastewater treatment plant (WWTP). The civil charge shall be suspended, provided Pine Street properly closes the WWTP, takes it off line and connects the discharge from the apartments to the Sussex Service Authority by November 30, 1999. The order also requires the submittal of an approvable plan and schedule for closure of the WWTP and requires Pine Street to operate the WWTP serving the apartments using Best Management Practices until the WWTP is closed and the discharge is connected to the Sussex Service Authority.

General Notices/Errata

On behalf of the State Water Control Board, the Department of Environmental Quality will receive notice written comments relating to the proposed consent special order until October 28, 1998. Comments should be addressed to Cynthia Akers, Department of Environmental Quality, Piedmont Regional Office, 4949-A Cox Road, Glen Allen, Virginia 23060. A copy of the order may be obtained in person or by mail from the above office.

Proposed Consent Special Order Weanack Land Limited Partners and USA Waste of Virginia, Inc.

The State Water Control Board proposes to issue a Consent Special Order to Weanack Land Limited Partners ("Weanack") and USA Waste of Virginia, Inc. ("USA Waste") for the barge terminal facilities on the James River at Shirley Cove Sand located in Charles City County. The proposed order requires the Weanack and USA Waste to pay a \$6,000 civil charge for failure to comply with the previously issued VWP permit. As part of the order, \$1,500 will be paid in cash and the balance of \$4,500 will be used as a Supplemental Environmental Project to create additional waterfowl habitats in Charles City County.

On behalf of the State Water Control Board, the Department of Environmental Quality will receive written comments relating to the proposed consent special order until October 28, 1998. Comments should be addressed to Christine Ryan, Department of Environmental Quality, Piedmont Regional Office, 4949-A Cox Road, Glen Allen, Virginia 23060-6295. A copy of the order may be obtained in person or by mail from the above office.

Pesticide Control Board

October 15, 1998 - 9 a.m. -- Public Hearing
Department of Agriculture and Consumer Services, 1100 Bank Street, Room 204, Richmond, Virginia.

November 2, 1998 - Public comments may be submitted until this date.

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the Pesticide Control Board intends to repeal regulations entitled: **2 VAC 20-50-10 et seq. Regulations Governing Pesticide Applicator Certification Under Authority of Virginia Pesticide Control Act**, and to adopt regulations entitled: **2 VAC 20-51-10 et seq. Regulations Governing Pesticide Applicator Certification Under Authority of Virginia Pesticide Control Act**. The present proposed regulation is predicated on a Notice of Intended Regulatory Action published in the Virginia Register of Regulations on May 12, 1997, at page 1910. Although that Notice of Intended Regulatory Action indicated that the agency intended to amend 2 VAC 20-50-10 et seq. Regulations Governing Pesticide Applicator Certification Under Authority of Virginia Pesticide Control Act, the agency has determined, in consultation with the Registrar of Regulations, that it would be simpler to set out the amended language by repealing the entirety of the existing regulation and proposing a new regulation that contains much of the language of the existing regulation, along with the substantive amendments contemplated by the aforementioned Notice of Intended Regulatory Action. The substantive features of the proposed regulation not contained in the existing regulation will clarify requirements for certification of applicators of pesticides in accordance with statutory changes effective July 1, 1995, in §§ 3.1-249.27, 3.1-249.51, and 3.1-249.53 of the Code of Virginia, as well as respond to comments from the general public and industry workers in response to the agency's review of regulations under the Governor's Executive Order 15 (94). The certification regulation sets standards of certification for persons specified by statute who use or supervise the use of pesticides in Virginia. Those persons governed by the regulation include, but are not limited to, farmers using restricted use pesticides (any pesticide classified for restricted use by the Administrator of the United States Environmental Protection Agency) on their own land and persons who apply pesticides commercially. The certification regulation does not apply to persons who use general use pesticides (any pesticide classified as general use by the Administrator of the United States Environmental Protection Agency) in and around their homes. The certification regulation will help to assure that those

persons subject to the certification regulation are adequately trained and competent to use pesticides.

Several changes from the current regulation were made when the proposed regulation was being drafted. Several sections of the proposed regulation were developed to produce a document that is easier to read and comprehend. A few terms and definitions have been added to the proposed certification regulation where needed for clarification. The proposed certification regulation includes a summary of who must be certified to apply pesticides in Virginia. Lists of the various classifications of pesticide applicators and the procedures for becoming certified are also included.

In the section of the proposed certification regulation concerning exemptions (2 VAC 20-51-60), forestry applicators (commercial pesticide applicators who apply pesticides in forestry environments) using general use herbicides (any herbicide classified as general use by the Administrator of the United States Environmental Protection Agency) for forest vegetation control under the direct onsite supervision of a commercial pesticide applicator (an applicator who uses or supervises the use of any pesticide for any purpose or on any property for compensation) have been added to the list of those persons who are exempt from certification. The categories for private pesticide applicator (an applicator who uses or supervises the use of any pesticide which is classified for restricted use for the purposes of producing any agricultural commodity) certification have been combined to form four categories rather than the current seven. A section has been added to the proposed certification regulation to provide details about the specific requirements for on-the-job training for registered technicians (an individual who renders services similar to those of a certified commercial pesticide applicator, but who has not completed all the training or time in service requirements to be eligible for examination for certification as a commercial pesticide applicator and is limited to application of general use pesticides).

2 VAC 20-50-120 was combined with 2 VAC 20-50-130 to make renewal of certification (training) and certificates (the document) occur at the same time instead of two different years. This proposed section also requires payment of the certificate fee on a biennial basis instead of an annual basis.

2 VAC 20-51-190 has been added to the proposed certification regulation to allow individuals who have received reciprocal certification to be recertified in Virginia by maintaining their training in the state where they are certified. Evidence of Financial Responsibility (2 VAC 20-50-220), a section that is included in the current certification regulation, has been deleted from the proposed certification regulation because it is not the Pesticide Control Board's intent to require Commercial Applicators-Not-for-Hire (a commercial pesticide applicator who uses or supervises the use of pesticides as part of his duties only on property owned or leased by

him or his employer) to provide evidence of financial responsibility. This is a requirement placed on commercial firms that apply pesticides and is adequately covered by Rules and Regulations Governing Licensing of Pesticide Businesses by the Department of Agricultural and Consumer Services Operating Under Authority of the Virginia Pesticide Control Act (2 VAC 20-40-80). Any person who needs any accommodation in order to participate at the meeting should contact the board at least 10 days before the meeting date so that suitable arrangements can be made.

STATE AIR POLLUTION CONTROL BOARD

September 28, 1998 -- Public comments may be submitted until 4:30 p.m. on this date.

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the State Air Pollution Control Board intends to amend regulations entitled: **Regulations for the Control and Abatement of Air Pollution Control (Rev. ZZ); 9 VAC 5-20-10 et seq. General Provisions; 9 VAC 5-40-10 et seq. Existing Stationary Sources; 9 VAC 5-50-10 et seq. New and Modified Stationary Sources.** The regulation amendments concern provisions covering municipal solid waste (MSW) landfills and are summarized below.

Facilities to which the rule applies are MSW landfills which commenced construction, reconstruction, or modification before May 30, 1991. In the Northern Virginia Volatile Organic Compound (VOC) Control Area, the design capacity applicability criteria is 1.0 million megagrams (Mg) or more; the emission rate applicability criteria is emissions of nonmethane organic compounds (NMOCs) greater than or equal to 23 Mg per year. In the remainder of the Commonwealth, the design capacity applicability criteria and the emissions rate applicability criteria are 2.5 million Mg in capacity and 50 Mg per year or more in emissions, respectively.

Landfills with a design capacity equal to or greater than the design capacity applicability criteria must determine their NMOC emissions. If the NMOC emission rate is less than the emission rate applicability criteria, the landfill must submit an emission report, and recalculate the NMOC emission rate until it is equal to or greater than the emission rate applicability criteria or the landfill is closed. If the calculated NMOC emission rate is equal to or greater than the emission rate applicability criteria, a collection and control system design plan must be

submitted, followed by the installation of a collection and control system.

Active collection systems must be designed to handle the maximum expected gas flow rate at a sufficient extraction rate and be designed to minimize off-site gas migration. Passive collection systems must be installed with liners, then must either destroy the collected gas or treat it for sale or use. Operational standards direct how landfills must operate collection systems in order to minimize emissions and operate safely. Test methods and procedures are provided in order for sources to calculate the NMOC emission rate. Once the NMOC emission rate is established, the landfill is classified as Tier 1, 2, or 3, depending on whether the NMOC emission rate is less than or greater than the emission rate applicability criteria; the NMOC concentration is determined using a specific sampling procedure; or the NMOC mass emission rate is determined using specific equations.

Compliance is determined through specific methods. Monitoring of operations is achieved through the installation of various sampling ports and devices. Reporting and recordkeeping requirements are delineated. Finally, installation of emission collection and control equipment capable of meeting the standards must be accomplished by 30 months after the rule's effective date.

Request for Comments: The purpose of this notice is to provide the public with the opportunity to comment on the proposed regulation and the costs and benefits of the proposal.

Localities Affected: Facilities located in the Northern Virginia VOC Control Area (Arlington County, Fairfax County, Loudoun County, Prince William County, Stafford County, City of Alexandria, City of Fairfax, City of Falls Church, City of Manassas, City of Manassas Park) must meet more restrictive design capacity applicability criteria and emission rate applicability criteria. These special criteria are required in order to meet emission reduction requirements for serious nonattainment areas (as required by Part D of the federal Clean Air Act), rather than to meet requirements for designated pollutants (§ 111(d) of the federal Clean Air Act), and have been in place since 1996.

Location of Proposal: The proposal, an analysis conducted by the department (including a statement of purpose, a statement of estimated impact and benefits of the proposed regulation, an explanation of need for the proposed regulation, an estimate of the impact of the proposed regulation upon small businesses, identification of and comparison with federal requirements, and a discussion of alternative approaches), and any other supporting documents may be examined by the public at the department's Office of Program Development (Eighth Floor), 629 East Main Street, Richmond, Virginia and the department's regional offices (listed below) between 8:30 a.m. and 4:30 p.m. of each business day until the close of the public comment period.

October 6, 1998 - Public comments may be submitted until 4:30 p.m. on this date.

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the State Air Pollution Control Board intends to amend regulations entitled: **9 VAC 5-40-10 et seq. Regulations for the Control and Abatement of Air Pollution (Rev. E97)**. The regulation amendments concern provisions covering fuel burning equipment. The regulation has been revised in order to clarify the fact that internal combustion engines (stationary combustion turbines) are considered to be fuel burning equipment, and that stationary internal combustion engines have been specifically exempted from this rule.

Request for Comments: The purpose of this notice is to provide the public with the opportunity to comment on the proposed regulation and the costs and benefits of the proposal.

Localities Affected: There is no locality which will bear any identified disproportionate material air quality impact due to the proposed regulation which would not be experienced by other localities.

Location of Proposal: The proposal, an analysis conducted by the department (including a statement of purpose, a statement of estimated impact and benefits of the proposed regulation, an explanation of need for the proposed regulation, an estimate of the impact of the proposed regulation upon small businesses, identification of and comparison with federal requirements, and a discussion of alternative approaches), and any other supporting documents may be examined by the public at the department's Office of Air Regulatory Development (Eighth Floor), 629 East Main Street, Richmond, Virginia, and the department's regional offices (listed below) between 8:30 a.m. and 4:30 p.m. of each business day until the close of the public comment period.

Department of Environmental Quality, 629 East Main Street, Training Room, Richmond, Virginia.

November 13, 1998 - Public comments may be submitted until this date.

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the State Air Pollution Control Board intends to amend regulations entitled: **Regulations for the Control and Abatement of Air**

Calendar of Events

Pollution (Rev. GG): 9 VAC 5-20-10 et seq. General Provisions and 9 VAC 5-40-10 et seq. Existing Sources. The regulation amendments concern provisions covering municipal waste combustors (MWCs). The affected facility to which the provisions of the regulation apply is each MWC unit with a combustion capacity greater than 250 tons per day of municipal solid waste (MSW) for which construction was commenced on or before September 20, 1994.

Emissions limitations are established for particulate matter, carbon monoxide, cadmium, lead, sulfur dioxide, hydrogen chloride, dioxin/furan, nitrogen oxides (No_x), opacity, and fugitive dust. Compliance provisions cover startup, shutdown, and malfunction; procedures for calculating unit capacity are specified. Nitrogen oxides emissions averaging, which may be used at the sources' discretion, is described in detail.

Compliance schedules are specified. Operating practices are delineated and include the regulation of particulate matter control device inlet temperature. An important component of the regulation is the operator training and certification provisions, which describe procedures and programs for assuring operator qualifications. Test methods and procedures describe which reference methods are to be used for determining compliance with each emission standard. Monitoring systems are specified, including specific performance specifications and averaging methods. Finally, reporting and recordkeeping requirements describe how all of the above information is to be gathered, stored, and reported.

Request for Comments: The purpose of this notice is to provide the public with the opportunity to comment on the proposed regulation and the costs and benefits of the proposal.

Localities Affected: There is no locality which will bear any identified disproportionate material air quality impact due to the proposed regulation which would not be experienced by other localities.

Location of Proposal: The proposal, an analysis conducted by the department (including a statement of purpose, a statement of estimated impact and benefits of the proposed regulation, an explanation of need for the proposed regulation, an estimate of the impact of the proposed regulation upon small businesses, identification of and comparison with federal requirements, and a discussion of alternative approaches), and any other supporting documents may be examined by the public at the department's Office of Air Regulatory Development (Eighth Floor), 629 East Main Street, Richmond, Virginia, and the department's regional offices (listed below) between 8:30 a.m. and 4:30 p.m. of each business day until the close of the public comment period.

BOARD FOR CONTRACTORS

October 2, 1998 - Public comments may be submitted
through this date.

Notice is hereby given in accordance with § 9-6.14:7.1
of the Code of Virginia that the Board for Contractors
intends to amend regulations entitled: **18 VAC 50-30-10
et seq. Board for Contractors Tradesman Rules and
Regulations.** The proposed amendments add backflow
prevention device workers to the trades regulated by the
Tradesman Program. The voluntary statewide
certification program for backflow prevention device
workers mandated by the General Assembly will enable
such workers to practice in different areas of the
Commonwealth without having to apply for certification
in each jurisdiction separately. Except for fees for the
new program, there are no changes in the current fee
structure of the Tradesman Program. Some editorial
changes are also made.

October 23, 1998 - 9 a.m. -- Open Meeting
Department of Game and Inland Fisheries, 4000 West Broad Street, Richmond, Virginia.  (Interpreter for the deaf provided upon request)

The board will address amendments to fish and fishing regulations proposed at its August 20, 1998, meeting. This is the regular biennial review of regulations governing freshwater fish and fishing, including seasons, creel limits, methods of take, and possession. The board will solicit comments from the public during the public hearing portion of the meeting, at which time any interested citizen present shall be heard. The board then intends to adopt fishing regulations to be effective from January 1999 through December 2000. The board reserves the right to adopt final amendments which may be more liberal than, or more stringent than the regulations currently in effect, or the regulation amendments proposed at the August 20, 1998, board meeting, as necessary for the proper management of wildlife resources.

The board may review proposals for legislation for the 1999 session of the General Assembly, and may discuss general and administrative issues. The board may hold an executive session before the public session begins on October 22. If the board completes its entire agenda on October 22, it may not convene on October 23.

DEPARTMENT OF LABOR AND INDUSTRY

† **October 20, 1998 - 2 p.m.** -- Public Hearing
State Capitol, Capitol Square, House Room 2, Richmond, Virginia.

November 30, 1998 - Public comments may be submitted until this date.

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the Department of Labor and Industry intends to **repeal** regulations entitled: **16 VAC 15-20-10 et seq. Regulations Establishing a Multiple of Federal Minimum Hourly Wage Relating to Garnishment of Wages** and **adopt** regulations entitled: **16 VAC 15-21-10 et seq. Maximum Garnishment Amounts.** Section 34-29 of the Code of Virginia provides that the maximum amount which may be garnished by an employer is that amount by which an employee's disposable earnings for a week exceed 30 times the federal minimum hourly wage rate (F.M.W.R.) in effect at the time earnings are payable. That section also provides that an employer may not garnish more than 25% of disposable earnings in cases of ordinary debt. The section requires the Commissioner of Labor and Industry to establish equivalent maximum earnings which may be garnished by employers for other pay periods, such as biweekly, semimonthly, monthly, and longer than monthly pay periods.

The current regulation, 16 VAC 15-20-10 et seq., contains specific dollar figures based on the then-current F.M.W.R. Since 1970, the F.M.W.R. has increased

several times, requiring the commissioner to repeatedly revise the regulation.

The commissioner proposed to repeal the current regulation and to replace it with a new regulation, proposed 16 VAC 15-21-10 et seq. Maximum Garnishment Amounts. The purpose of the replacement regulation is to clearly set forth the method for calculating the necessary amounts, but to omit specific dollar amounts. This new regulation will not make any substantive change to the previous method of calculating the maximum garnishment amounts. The new regulation will simply and clearly state the method of calculation, and omit any specific dollar amounts as shown in the current regulation.

Statutory Authority: § 34-29 of the Code of Virginia.

Safety and Health Codes Board

October 2, 1998 - Public comments may be submitted until this date.

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the Safety and Health Codes Board intends to amend regulations entitled: **16 VAC 25-50-10 et seq. Boiler and Pressure Vessel Rules and Regulations.** The proposed amendments incorporate the transfer of authority for setting various fee amounts from statute to regulation, and adopt several changes recommended individually or jointly by the regulated community, the National Board of Boiler and Pressure Vessel Inspectors, or the Chief Boiler and Pressure Vessel Inspector of the Commonwealth.

The proposed amendments also direct Commonwealth inspectors to inspect uninsured boilers and pressure vessels in those geographic areas or limited time periods within which commercial services would not be available, set out the chief inspector's criteria for determining unavailability, and establish rates for certification inspections conducted by Commonwealth inspectors. These changes eliminate a criticism of the current privatized inspection system and are directed by Chapter 212, 1997 Acts of Assembly.

Also included in these proposed amendments are changes suggested by the department's regulatory review and a request by the department to require the national board "R" and "VR" stamp certification for organizations performing repairs and alterations to boilers and pressure vessels, and the repair and resetting of safety valves. Current regulation requires

that all boilers and pressure vessels be designed, constructed and installed in accordance with the ASME Boiler and Pressure Vessel Code. However, the ASME code does not establish standards for repair or alteration of these objects once they have been code stamped and installed.
